ISO 9001:2015 DRAFT INTERNATIONAL STANDARD

Quality Management System Awareness/Foundation Course

ISO 9001: The world’s most popular standard for quality management, is now published as a Draft International Standard (DIS). The final version is expected to be officially published in September 2015.

Over 1.2 million organisations (worldwide) are certified to ISO 9001 and the revised version is now aligned with the so called High Level Structure (HLS). This means that all the new ISO management system standards will be aligned on the common requirements, which will make it easier for organisations to implement them going forward.

Be among the first to explore the changes in detail and familiarize yourself with the first stage of its transformation. More interestingly, learn how DNV GL is able to provide a tool to address this new revision.

Who should attend
This course is will be extremely useful as an introduction for anyone with the intent to implement the new ISO 9001:2015 and specially for:

- Those who need to understand ISO 9001 and how it works
- Those with responsibility for implementing quality management systems
- Those with an interest in quality management systems
- Those starting their career in quality management
- Those tasked to prepare for the upgrade of existing management systems.
Next Generation ISO Management Systems

To address the different needs of organizations, DNV GL has prepared 2 different options of training:

Awareness Training (Day 1) will deliver the key changes in the new standard, while Foundation Training (Days 1 & 2) will offer insights into the DNV GL solution using Next Generation Risk-Based Certification to address the emerging stakeholders’ needs.

Day 1 Learning Objectives:
- Identify the key envisaged changes to ISO 9001
- Explain the purpose and use of Annex SL Appendix 2
- Communicate any changes in QMS specific requirements arising as a result of transitioning from ISO 9001:2008 to ISO 9001:2015

Day 2 Learning Objectives:
- Identify what the changes will mean for organisations
- Types of emerging stakeholder (interested parties) pressures on your business
- Risk analysis - types of risk linked to your business processes
- The new versions of the standards as enablers for sustainable business performance
- How DNV GL’s Next Generation Risk-Based Certification can help you address the emerging risks

ISO 9001:2015 DIS Awareness Training
Next Generation ISO Management Systems
(1-day Course)

ISO 9001:2015 DIS Foundation Training
Next Generation ISO Management Systems
(2-day Course)

Course Benefits
The course(s) is interactive in nature with emphasis on active involvement of participants in group-work, brainstorming sessions, reflection exercises and assessment of case studies.

- Understand the transition requirements (based on the DIS) from ISO 9001:2008 to ISO 9001:2015
- Inform others about the new requirement intended for ISO 9001:2015
- First-hand experience of the upcoming versions of the standards as DNV GL is an active member on the ISO committee for the development of standards
- Greater understanding of the advantages and opportunities will offer for your (integrated) management system.
- Highly interactive exercises and case studies.
- Discussion with peers facing similar challenges when upgrading their management system.
- Working sessions to consider impact to your own organisation’s management system.
- Course developed and conducted by experienced lead auditors & trainers.
- Number of participants for each course is restricted to ensure effective involvement of every participant.
